# Operate with efficiency

Reliable operating theatre equipment is vital in aiding surgical procedures.

With an increase in ageing equipment in operating theatres, the Smarter Practico operating table is a flexible solution for orthopaedic and shoulder surgery.

This table provides your theatre team with ease of adjustment and positioning, with various configurations and accessories.

Smarter Practico provides excellent ergonomics for both patients and clinical teams. The operating table is designed with a large cutout section providing you with access to the patient during orthopaedic procedures.

## Benefits

Improved access to the surgical area

- **Large cutout back section provides access to the shoulder**

Increased ergonomics

- **Various posture possibilities for ease of adjustment**

Straightforward patient positioning

- **Electronically adjusted movements**

Higher safe working load

- **Durable, reliable table for treatment of all patients**

Safe, smart anti-collision

- **Recognition of potential mechanical collisions**

## Configurations and accessories

Various options of the Smarter Practico are available to suit the requirements of your operating theatre.

- **Low, standard and high lifting columns: 540-1030 mm**
- **Beach chair back section**
- **Helmet type head rest 30128**
- **Support belt 20127**
- **Arm rests**
  - Various models complete the set-up for excellent patient safety and ergonomics
- **Leg section**
